What's New in the?

AutoCAD can now create a new file by appending or overwriting existing files. The AutoCAD module modautocad2022 can now be used to automate saving and closing drawings (after the lockfile). Spline & Dimension toolbars: New Sliding and Spacing tools have been added to the spline and dimension toolbars. These tools let you quickly move and display tools on their respective toolbars. You can now interactively adjust the axis format of your spline and dimension lines. You can also adjust the size of the brackets on your dimension lines. (video: 1:48 min.) Slide View: Slide View will now automatically update to show the most recently viewed drawing in the Slide View toolbar. You can move drawings into or out of the view. (video: 2:14 min.) Door Handle and Curve tools: New spline and line tool inputs have been added to the Door Handle and Curve tools. These tools let you create handles, hinges, and door curves. Two new commands have been added to the Tools menu. Quick command enables you to access the command dialogs by pressing the right or down key. The keystroke will change depending on the tool selected. You can also press the, key to access the tool dialog. AutoCAD now automatically registers the names of glyphs as they are added to a drawing. 2D & 3D Extrude: You can now push and pull objects with multiple objects. Angle arrows have been added to the 3D Properties palette. You can select an angle arrow from the tool input list. CDeveloper: CDeveloper now has the ability to update your project license automatically from within the license tab. (video: 1:53 min.) AutoCAD® Save a drawing file as a new format or update the file to support the new features. Print Custom Settings or Reference Documents. Faster Print: Printing speed is now about three times faster than before. Dynamic Add Dimension Formatting: Modify the formatting of your dimensions based on the type of axis you are using. (video: 1:20 min.) Dynamic Draw Graphics in Reference Drawing View: The new View Options dialog in the Reference tab lets you define
